About Myself

Fausto Giunchiglia's homepage

- Member of Academia Europaea
- Full Professor in University to Trento, Italy
- TANG Aoqing Chair Professor, Honorary Professor of Jilin University, China

Research

- Artificial Intelligence
- Formal Methods
- Automated Reasoning
- Knowledge Management

About Unitn

University of Trento

- 37th of the world's young (<50) universities
- Top 200 all over the world universities

About DISI

Department of Information Engineering and Computer Science
(<https://www.disi.unitn.it>)

- Founded in 1993, with ICT International Doctoral School founded in 2001.
- Two areas: C.S. & I.E.
- C.S. is ranked 72th of the 100 Depts in the world, 1st in Italy.

About KnowDive

Knowledge Diversity (<http://knowdive.disi.unitn.it/>)

- Founded by Prof. Giunchiglia
- Global leading group of AI
- Internationalized, cross-cultural, multi-lingual...

3 About KDI

16 from Honors Program in Science

- 3rd year undergraduates, aiming at top research careers.
- Majoring in Computer Science with basic skills.
- Full of passion, potential and perseverance to explore.

Motivation

- Intrigued by the Overseas Quality Course Import Program.
- Motivated by the era of big data.
- Just a shot / try...

We hope you can answer the question after this KDI:

**Can we use take better usage of
the heterogeneous big data?**

Original Settings

The intended students are students of the **master** degree in Computer Science of the Department of Computer Science and Information Engineering (DISI) of the University of Trento.

There are no formal **pre-requisites**, but knowledge of modeling languages (e.g., ER Models, UML models) and of the Web languages (e.g., XML, RDF, OWL) is useful.

In Unitn, KDI is a 14 week, 48 hours, six credit, **advanced** course on how to collect, process and perform data and, to a certain extent, also data integration.

This is a **hands-on** course. After a few introductory classes, students are given a problem to solve and they need to build a knowledge graph solving this problem. This graph must be built by integrating data which are available in the Web.

Syllabus

Dec. 7 — Dec. 18 18:30 — 21:05 (UTC+8) with the [course web site](#).

Flip classes will be done 'off-line' with the [website of KDI-Unitn](#).

Management

■ Project

- There will be 4 projects running in this cycle.
- Each project will be carried out by a team of 4 students.

■ Role

Students will play ***different*** roles.

- Project Manager
- Domain Expert
- Knowledge Engineer
- Data Scientist

■ Tutor

- Each team will be assigned a tutor.
- Each tutor will take charge of the ***procedural*** assessment of the team.
- Each team will present their achievements in the final phase and assessed by all the tutors.
